```java
import java.io.DataInputStream;

import java.io.DataOutputStream;

import java.net.Socket;

public class _5_client {
    public static void main (String args[]){
        try {
            Socket s = new Socket("localhost", 1234);

            DataOutputStream dos = new DataOutputStream(s.getOutputStream());

            DataInputStream dis=new DataInputStream(s.getInputStream());
//          dos.writeInt(12);
            dos.writeUTF("Hello Server");

            dos.writeInt(1);

            String str=(String)dis.readUTF();

            int a=dis.readInt();

            System.out.println(a);

            System.out.println(str);

            dos.flush();

            dos.close();

            s.close();
        }
        catch (Exception e){
            System.out.println(e);
        }
    }
}
```
